# 01 / Approaching the raised gate

T + 14 min | The direct route passes south of the entire gate.

Actual Bitsailor search snapshots • constant 5 m/s boat speed • constant northerly wind • no land

Origin rays show selected states. All panels share the same scale; rays are not sailed tracks.

ACTIVE FRONTIER

**798 states before gate**

**0 states after crossing**

GATE COVERAGE

**0 / 12 distinct intervals reached**

Retirement requires at least 6 / 12 (50%).

PRE-GATE STAGE

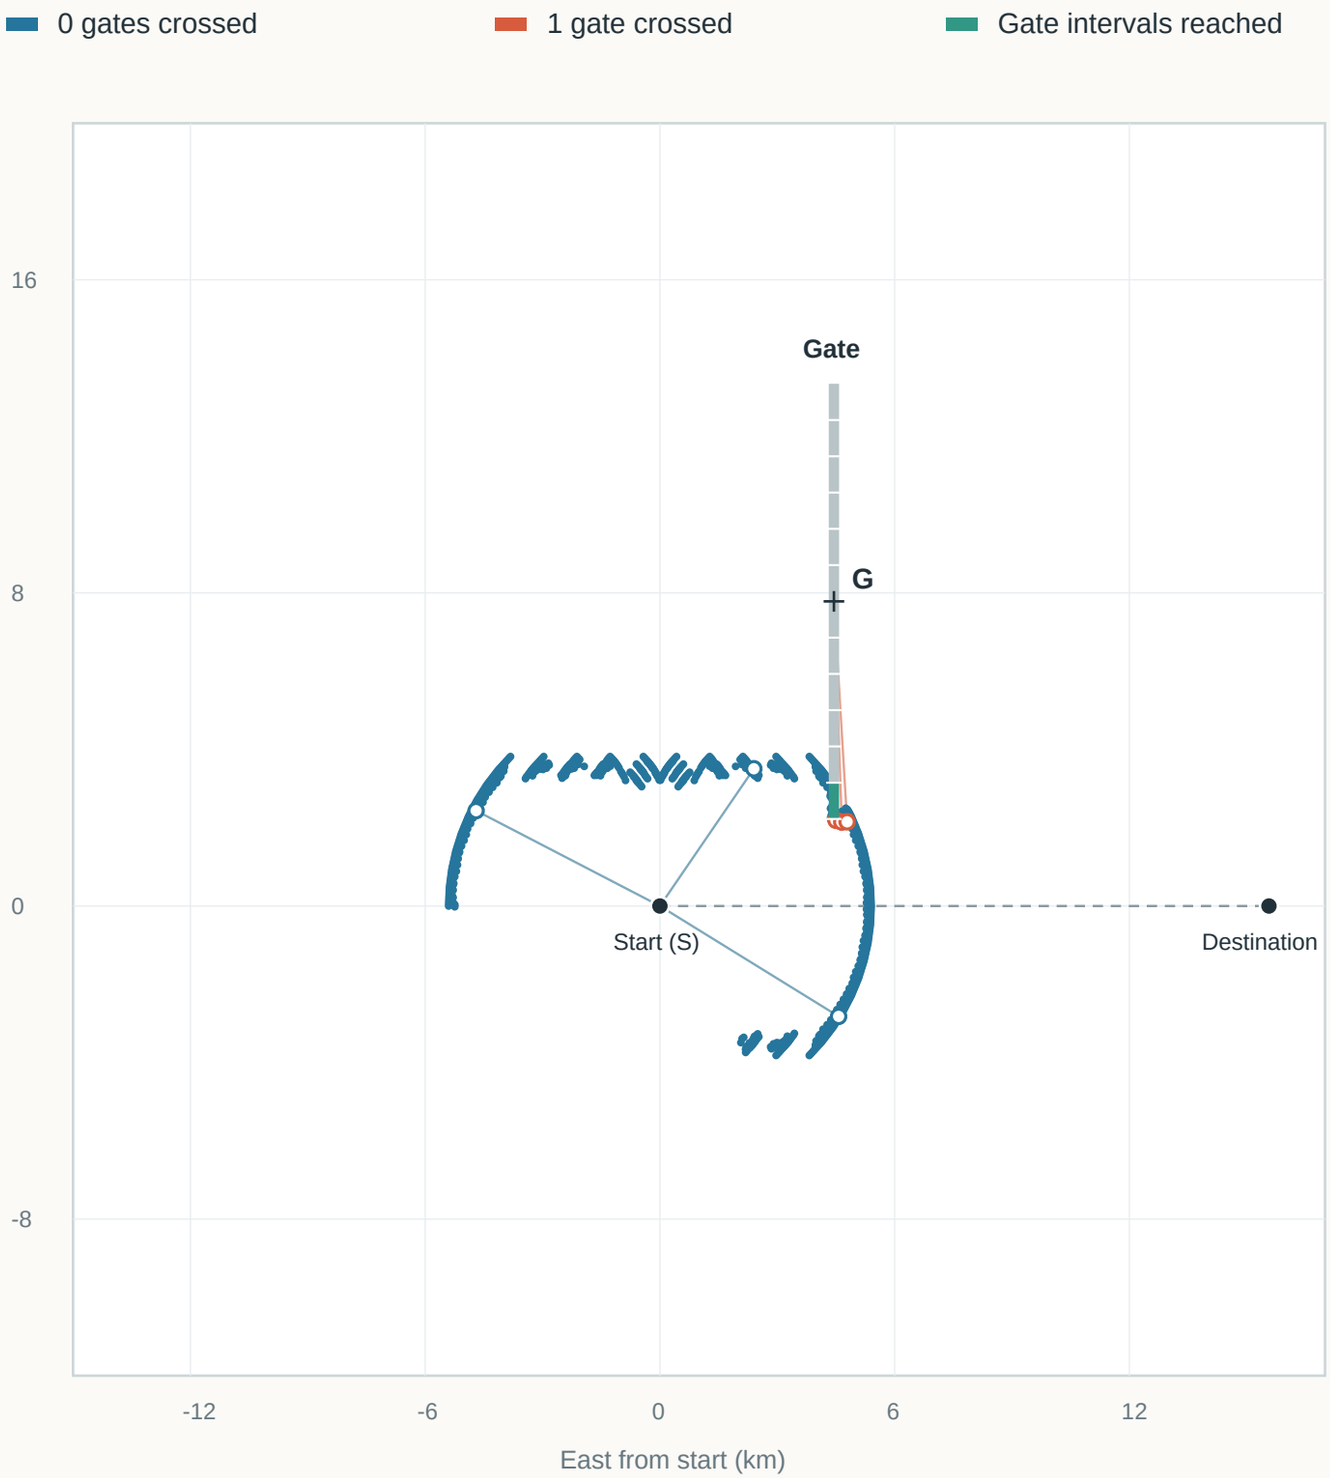

**ACTIVE**

Solid rays: fixed reference to state.
Blue starts at S; orange starts at G.
Dashed green: actual crossing to state.
The search fan uses the actual crossing;
buckets and radial pruning use S/G.

Hollow circles mark selected states
and their gate-crossing origins.

# 02 / First crossings

T + 18 min | Both stages advance on the same clock.

Actual Bitsailor search snapshots • constant 5 m/s boat speed • constant northerly wind • no land

Origin rays show selected states. All panels share the same scale; rays are not sailed tracks.

ACTIVE FRONTIER

**942 states before gate**

**18 states after crossing**

GATE COVERAGE

**1 / 12 distinct intervals reached**

Retirement requires at least 6 / 12 (50%).

PRE-GATE STAGE

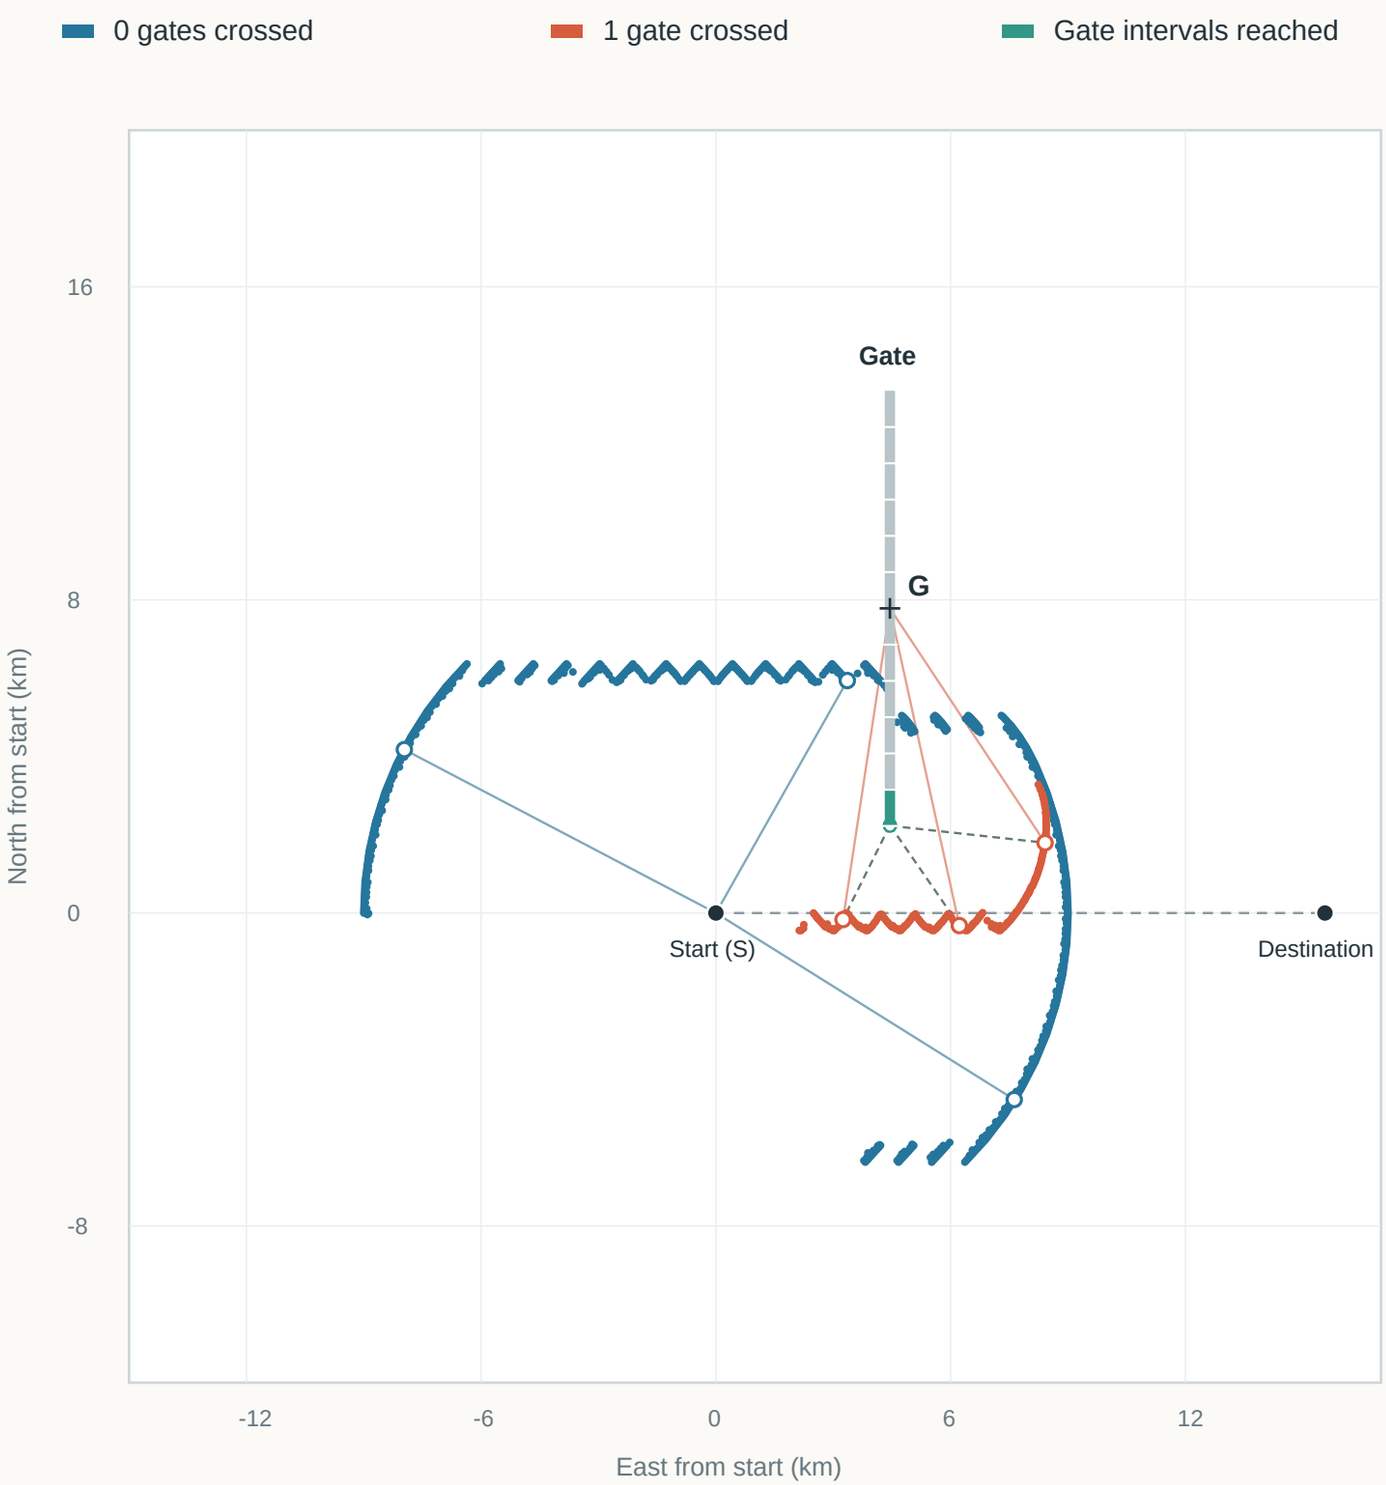

**ACTIVE**

Solid rays: fixed reference to state.
Blue starts at S; orange starts at G.
Dashed green: actual crossing to state.
The search fan uses the actual crossing;
buckets and radial pruning use S/G.

Hollow circles mark selected states
and their gate-crossing origins.

# 03 / Alternative approaches

T + 30 min | Later crossings remain in competition.

Actual Bitsailor search snapshots • constant 5 m/s boat speed • constant northerly wind • no land

Origin rays show selected states. All panels share the same scale; rays are not sailed tracks.

ACTIVE FRONTIER

**943 states before gate**

**230 states after crossing**

GATE COVERAGE

**1 / 12 distinct intervals reached**

Retirement requires at least 6 / 12 (50%).

PRE-GATE STAGE

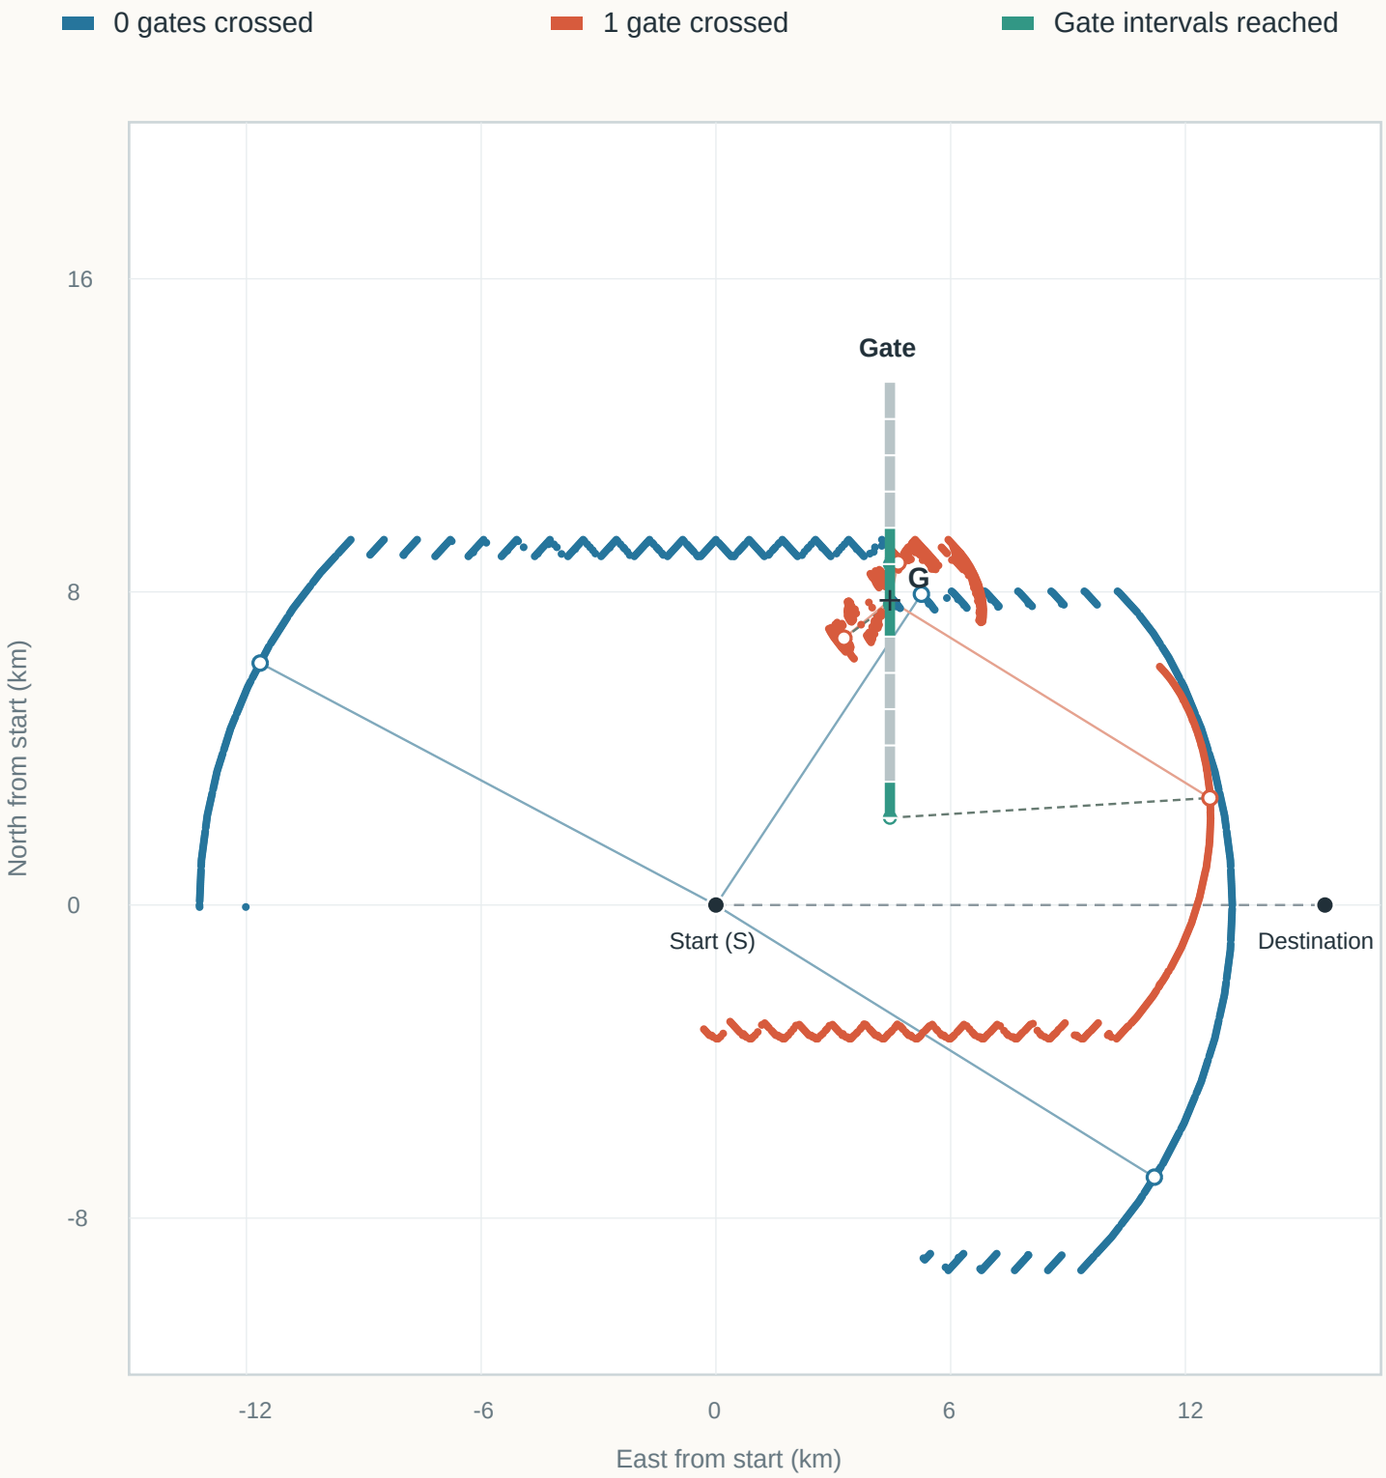

**ACTIVE**

Solid rays: fixed reference to state.
Blue starts at S; orange starts at G.
Dashed green: actual crossing to state.
The search fan uses the actual crossing;
buckets and radial pruning use S/G.

Hollow circles mark selected states
and their gate-crossing origins.

# 04 / Coverage increases

T + 44 min | 4 of 12 intervals reached; both stages still active.

Actual Bitsailor search snapshots • constant 5 m/s boat speed • constant northerly wind • no land

Origin rays show selected states. All panels share the same scale; rays are not sailed tracks.

ACTIVE FRONTIER

**959 states before gate**

**1,148 states after crossing**

GATE COVERAGE

**4 / 12 distinct intervals reached**

Retirement requires at least 6 / 12 (50%).

PRE-GATE STAGE

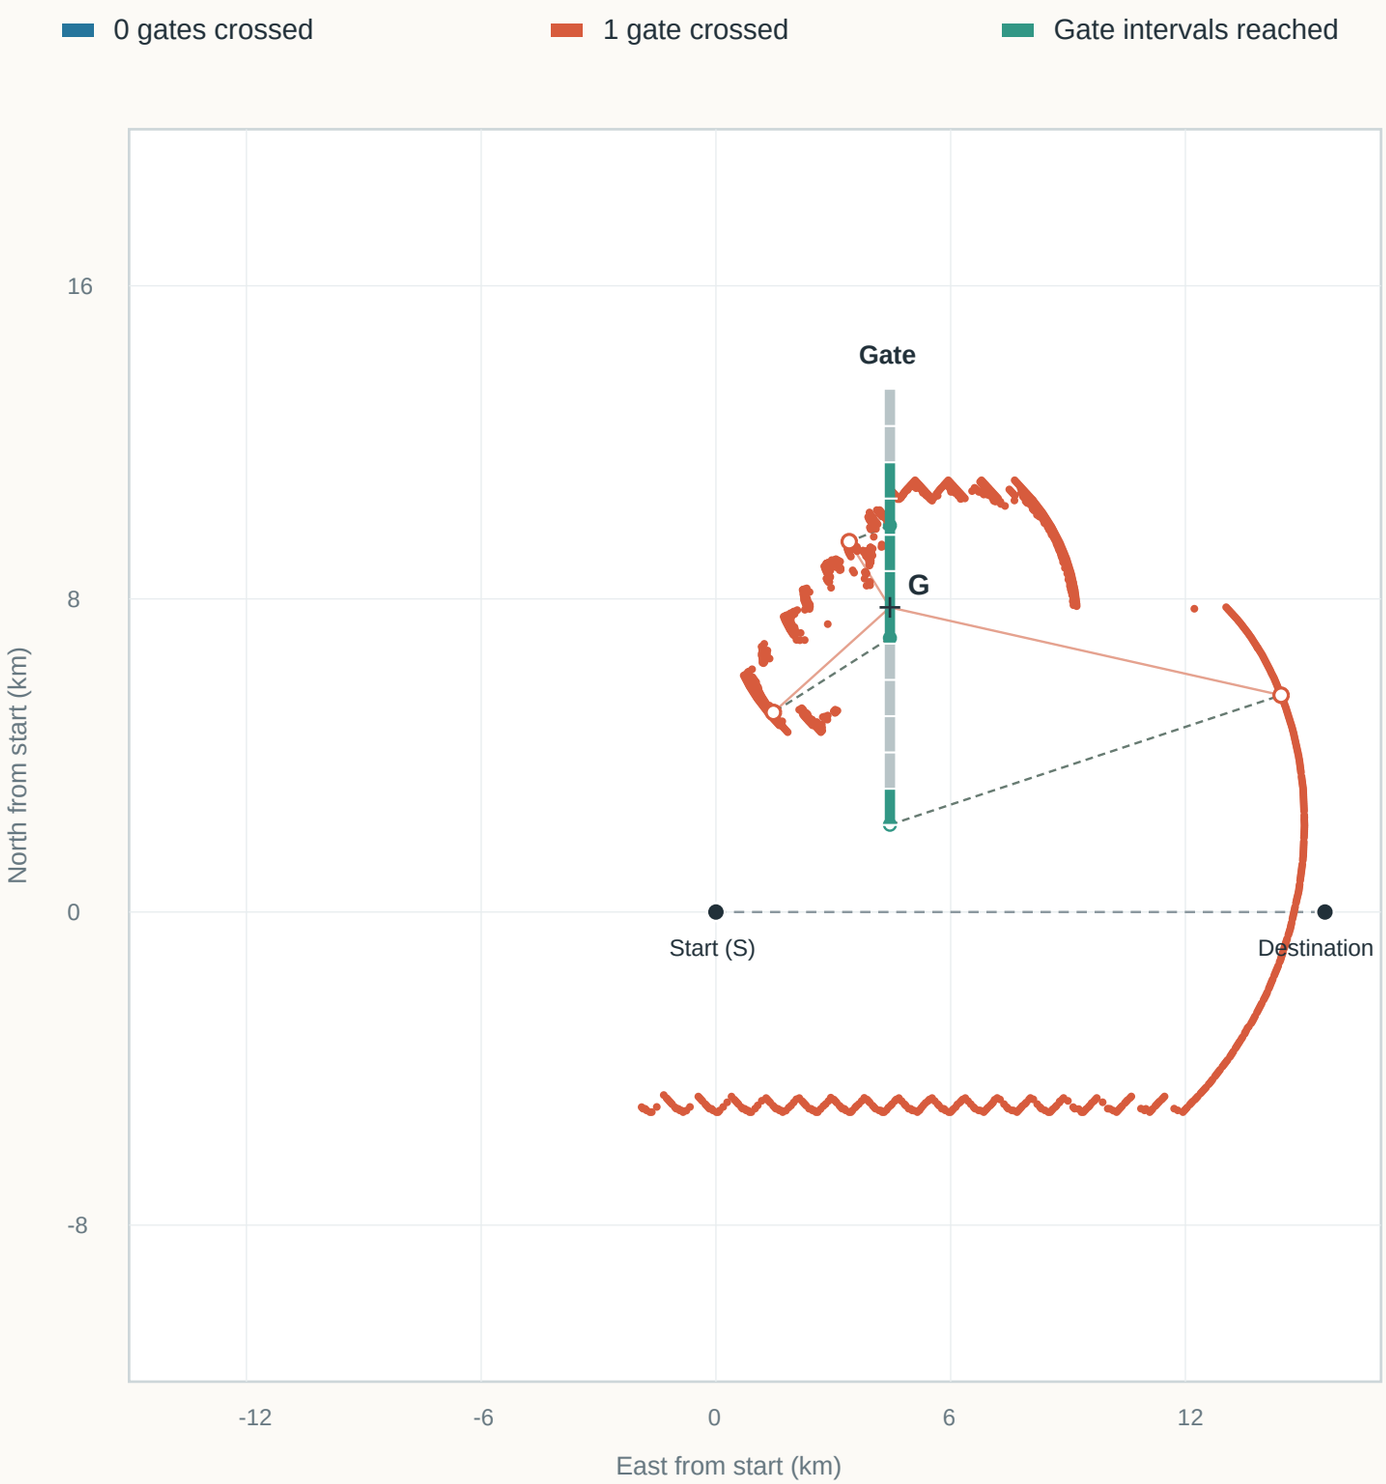

## ACTIVE

Solid rays: fixed reference to state.
Blue starts at S; orange starts at G.
Dashed green: actual crossing to state.
The search fan uses the actual crossing;
buckets and radial pruning use S/G.

Hollow circles mark selected states
and their gate-crossing origins.

# 05 / Pre-gate stage retires

T + 52 min | Coverage reaches 6/12: the 50% threshold.

Actual Bitsailor search snapshots • constant 5 m/s boat speed • constant northerly wind • no land

Origin rays show selected states. All panels share the same scale; rays are not sailed tracks.

ACTIVE FRONTIER

**0 states before gate**

**1,359 states after crossing**

GATE COVERAGE

**6 / 12 distinct intervals reached**

Retirement requires at least 6 / 12 (50%).

PRE-GATE STAGE

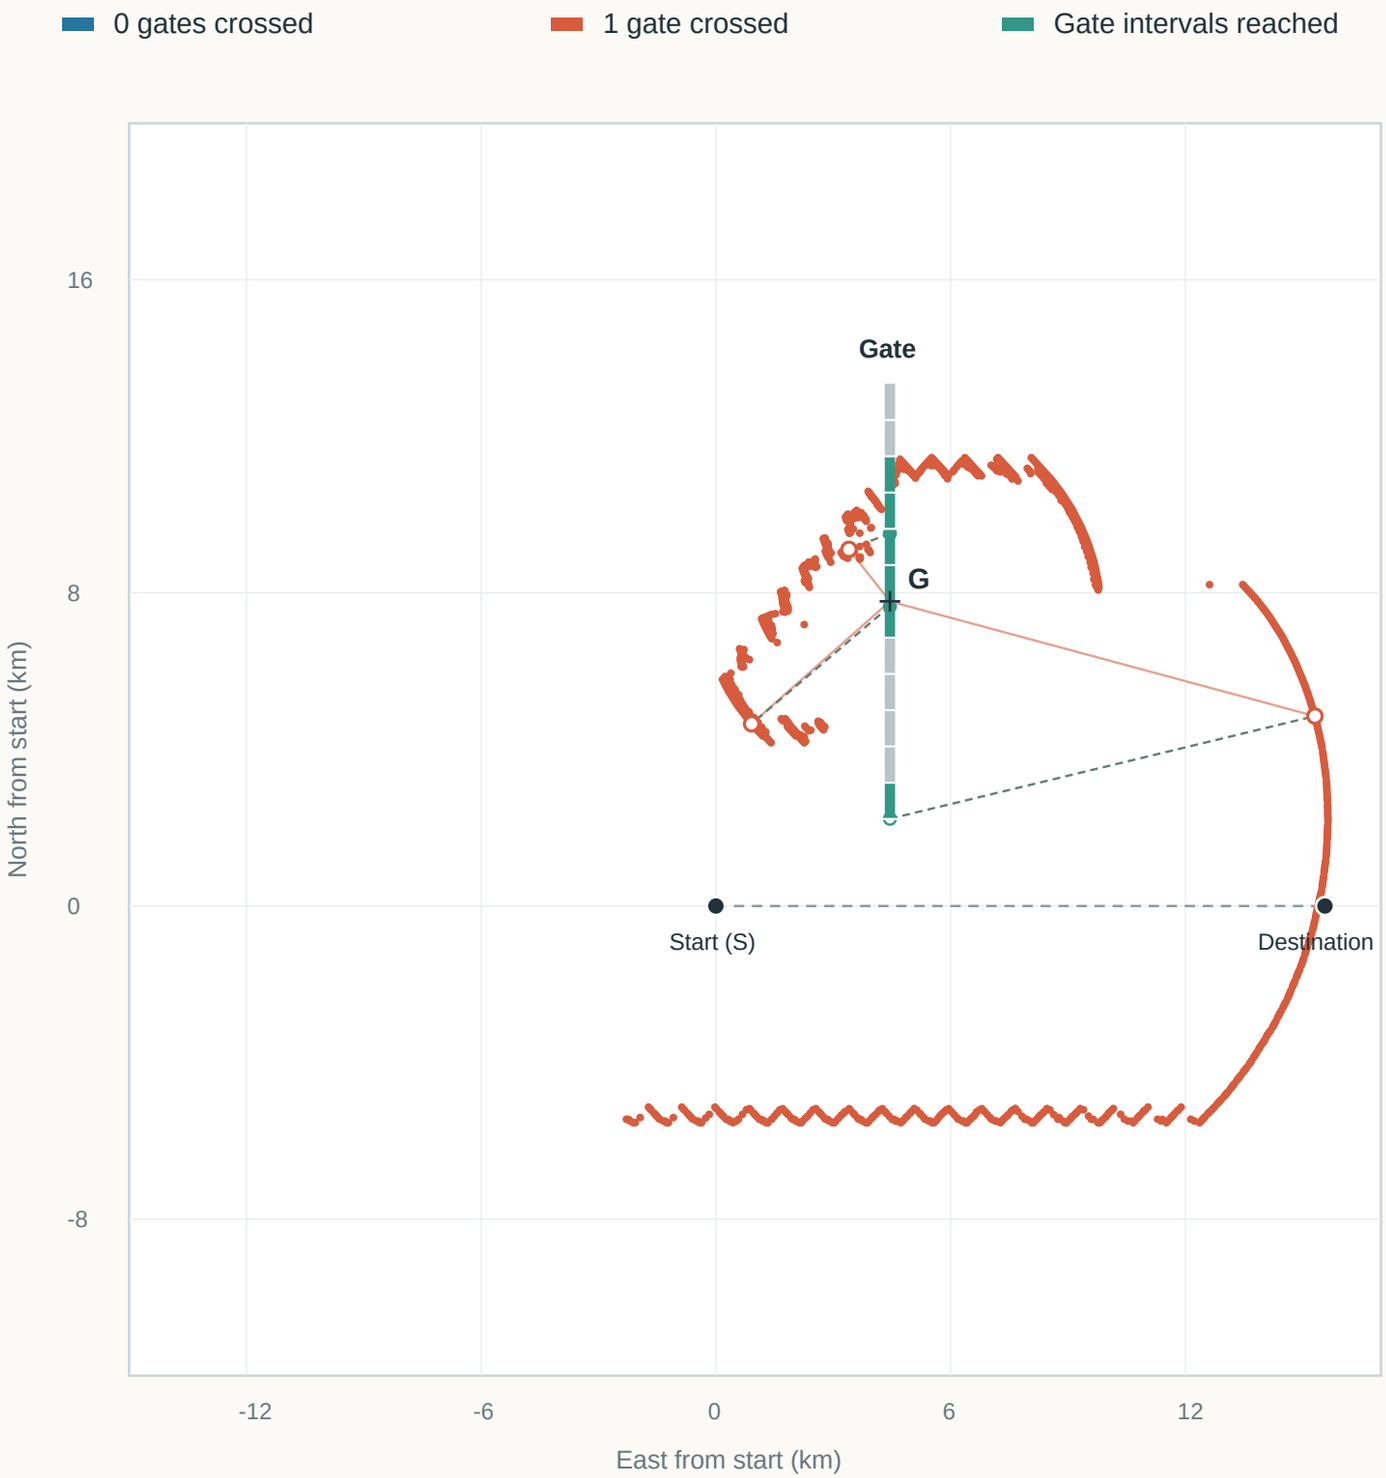

**RETIRED**

Solid rays: fixed reference to state.
Blue starts at S; orange starts at G.
Dashed green: actual crossing to state.
The search fan uses the actual crossing;
buckets and radial pruning use S/G.

Hollow circles mark selected states
and their gate-crossing origins.

# 06 / Continuing to destination

T + 54 min | Only histories that crossed the gate remain.

Actual Bitsailor search snapshots • constant 5 m/s boat speed • constant northerly wind • no land

Origin rays show selected states. All panels share the same scale; rays are not sailed tracks.

ACTIVE FRONTIER

**0 states before gate**

**1,352 states after crossing**

GATE COVERAGE

**6 / 12 distinct intervals reached**

Retirement requires at least 6 / 12 (50%).

PRE-GATE STAGE

**RETIRED**

Solid rays: fixed reference to state.
Blue starts at S; orange starts at G.
Dashed green: actual crossing to state.
The search fan uses the actual crossing;
buckets and radial pruning use S/G.

Hollow circles mark selected states
and their gate-crossing origins.
